Personalised Laser Eye Surgery to world-class standards.

At the London Vision Clinic, our screening process takes longer and is more thorough than almost any other clinic, in fact, we think it's one of the most comprehensive assessments in the world. It's not because we have a laid back work ethic. It's because we believe the amazing complexity of the eye and the range of different degrees of eye conditions out there make it necessary to have a wide variety of scans, measurements, and tests.

All this inevitably means we cost more than the standard Laser Eye Surgery clinic. So are we worth the extra cost?

Absolutely. The assessment process is one of the most crucial parts of having Laser Eye Surgery. The higher the level of safety, depth, and accuracy of the clinic's tests, the lower the chance of complications and greater the standard of results.

But we've only just scraped the surface of why to choose us as your Laser Eye Surgery clinic. Here at the London Vision Clinic we have some of the world's best laser eye surgeons, equipped with the most advanced laser technology available. This ensures that right through from the initial assessment to our extended aftercare regime, your vision could not be in better hands.
